

Computing Setup

Andee Kaplan

Duke University
Department of Statistical Science

May 2, 2018

Install R

- 1 Go to <https://www.r-project.org>
- 2 Click on “CRAN” on the left bar and select a mirror (0-Cloud is just fine!)
- 3 Click Download R for your OS and follow installation instructions

Install RStudio (optional)

- 1 Go to `https://www.rstudio.com/products/rstudio/download/`
- 2 Click “Download” for RStudio Desktop Open Source License (Free)
- 3 Choose your OS and follow installation instructions

Install packages

- 1 Open RStudio (or R console)
- 2 Run the installation script
